1 1. Overview

This testing plan outlines the validation activities required to ensure correct creation, data updates, workflow functionality, communication, quoting, attachments, and appointments for the following job types within the Vendor System:

- **Make Safe Jobs**
- **Builder Assessment Jobs**
- **Works Jobs**

The goal is to confirm that all job types behave as expected across end-to-end workflows, including quoting, variations, messaging, attachments, and appointment handling.

2 2. Scope

2.1 In Scope

- Automatic job creation from the insurance platform into the vendor system
- Data updates validation for all job types
- End-to-end workflow for each job type
- Quote and variation handling
- Messaging exchange (two-way)
- Attachment upload & receipt
- Appointment completion and specialist appointment actions
- Vendor Creation of Make Safe Jobs

2.2 Out of Scope

- UI/UX testing outside of functional validation
 - Non-functional testing (performance, load, stress)
-

3 3. Test Items

- Vendor Portal
 - Job creation integration
 - Messages API
 - Attachments API
 - Quoting and variation API
 - Appointment API
-

4 4. Assumptions

- Test accounts and sample jobs exist or will be generated on the day of the test
 - Integration between insurance and vendor environment is active
 - Required user roles have been provisioned
 - Notification systems (email/SMS, if applicable) are functioning
-

5 5. Test Cases

5.1 5.1 Automatic Job Creation

5.1.1 TC01 – Automatic Creation of Make Safe Jobs

Item	Details
Objective	Confirm Make Safe jobs are automatically created in the vendor system.
Steps	1. Trigger a Make Safe allocation from the insurance platform. 2. Verify job received in vendor system.
Expected Result	Make Safe job is created with correct metadata and status.

5.1.2 TC02 – Automatic Creation of Builder Assessment Jobs

Item	Details
Steps	1. Trigger Builder Assessment allocation. 2. Validate job received.
Expected Result	Builder Assessment job appears with accurate details.

5.1.3 TC03 – Automatic Creation of Works Jobs

Item	Details
Steps	1. Trigger Works allocation. 2. Confirm job appears.
Expected Result	Works job is created with all expected fields.

5.2 5.2 Data Storage Validation

5.2.1 TC04 – Validate Data Storage for All Job Types

Item	Details
------	---------

Steps	1. Open each job type. 2. Confirm all expected data fields are populated and stored.
Expected Result	Job data accurately reflects insurance-supplied data.

5.3 5.3 End-to-End Workflow Testing

5.3.1 TC05 – Make Safe End-to-End Testing

- Job creation
- Appointment scheduling
- Quote creation and automatic transfer
- Messaging and attachment functions
- Job completion

5.3.2 TC06 – Builder Assessment End-to-End Testing

- Job creation
- Appointment and specialist appointment flow
- Quote transfer (incl. line item status for cash settlement)
- Specialist report upload
- Completion

5.3.3 TC07 – Works Job End-to-End Testing

- Job creation
- Variations submission
- Messaging & attachments
- Finalisation

5.4 5.4 Quotes & Variations

5.4.1 TC08 – Quote Auto-Transfer for Make Safes

Steps	Expected Result
Submit Make Safe quote	Quote automatically transfers to the insurer

5.4.2 TC09 – Auto-Transfer of New Variation Quotes (Make Safes Requiring Further Works)

Steps	Expected Result
Submit variation quote after Make Safe	Variation is visible and can be published and approved in the Make Safe Job

5.4.3 TC10 – Quote Auto-Transfer on Builder Assessments (Incl. Line Item Status for Cash Settlement)

Steps	Expected Result
Submit assessment quote incl. cash settlement items	Quote transfers with correct line-item statuses

5.4.4 TC11 – Variations Submission on Works Jobs

Steps	Expected Result
Submit a Works variation	Variation is visible and can be published and approved

5.5 5.5 Attachments

5.5.1 TC12 – Vendor Attachment Upload for Each Job Type

Job Type	Expected Attachments
Make Safe	Before/after photos, reports
Builder Assessment	Reports, specialist docs
Works	Progress photos, signed docs

Expected Result:

Vendor can upload correct attachments with correct categories.

5.5.2 TC13 – Vendor Receives Attachments from Insurer

Steps	Expected Result
Insurer uploads attachment	Vendor sees and downloads successfully

5.6 5.6 Messaging (Two-Way)

5.6.1 TC14 – Vendor Sends Messages to Insurer (All Job Types)

Steps	Expected Result
Vendor sends message	Insurer receives message

5.6.2 TC15 – Vendor Receives Messages from Insurer

Steps	Expected Result
Insurer replies or sends new message	Vendor receives message

5.7 5.7 Appointments

5.7.1 TC16 – Vendor Completes Appointment on Make Safes

Steps	Expected Result
Complete Make Safe appointment	Status updates successfully

5.7.2 TC17 – Vendor Completes Appointment on Builder Assessment

Steps	Expected Result
Complete appointment	Status updates and triggers expected workflow

5.7.3 TC18 – Specialist Appointment Completion

Steps	Expected Result
Complete specialist appointment	Specialist Appointment in the Builder assessment job is visible to the insurer

5.7.4 TC19 – Specialist Report Upload

Steps	Expected Result
Upload specialist report with correct attachment type	Report stored and visible to insurer

5.8 5.8 Creation of Jobs

5.8.1 TC20 – Make Safe Job Created

Steps	Expected Result
Vendor creates a make safe job within the vendor system	Make safe job is automatically created in Crunchwork

6 6. Approval

Role	Name	Approval
Coda Lead		
Vendor Lead
